

ePAN® Bun Pans

Chicago Metallic ePAN® Bun Pans are manufactured from high tensile strength aluminized steel which produces a pan that is thinner and lighter, yet substantially stronger than traditional pans. Using less metal also means ePAN Bun Pans heat faster and cool more quickly.

Energy Efficient

ePAN® uses a thinner gauge but higher tensile strength aluminized steel that allows the pan to heat up and cool down faster, resulting in reduced energy costs.

Environmentally Sensible

ePAN® requires a substantially lower volume of raw material resulting in less resource consumption.

Ergonomically Sound

The lighter weight ePAN® - weighing up to 25% less than a traditional pan - makes handling more manageable and less stressful for employees.

Extended Pan Life

The high tensile strength of ePAN®'s aluminized steel minimizes the potential for pan damage.

BUNDY BAKING SOLUTIONS:

-  Baking Pans
-  Release Agents
-  Pan Coatings & Refurbishment
-  Equipment & Services

Ultimate Coatings

AMERICOAT® ePlus Silicone Glaze

ePAN® Bun Pans can be coated with Chicago Metallic's proprietary AMERICOAT® ePlus, the world's leading silicone release coating.

- Longer-lasting performance
- Reduced pan oil and labor costs
- Increased durability
- Reduced food staining

DuraShield® Non-Stick Coating

ePAN® Bun Pans can also be ordered with our DuraShield® fluoropolymer coating, which provides a guaranteed minimum of 3500 releases on most bun products.

- Virtually eliminates the use of oils
- Outstanding release characteristics
- Certified to be PFOA-free
- Easy to clean

Item #	In Stock	Coating	Description	Arrangement	Overall Size (in)
Hamburger Bun Pans
