

The Pan Glo[®] Process

We've perfected the process for cleaning and recoating baking pans through 25 years serving some of the world's largest and most demanding bakeries. Our exclusive methodology and coatings prolong pan life and restore optimal performance.

1. Straightening (Optional)

Hydraulic presses and custom-made dies remove dents and warping, restoring pans to their original shape.

2. Cleaning

A proprietary cleaning solution removes the existing coating as well as heavy greases and carbon from pans.

3. Rinsing

Pans are restored to pristine cleanliness.

4. Drying

Pans are dried in industrial ovens.

5. Coating

Pans are coated with our AMERICOAT[®] ePlus^{*} coating and cured in high-temperature batch ovens.

*DuraShield[®] long-life coating also available at some locations.

6. Shipping

In most cases, pans will be back in your bakery and good as new within 48 hours.

BUNDY BAKING SOLUTIONS:

Baking Pans

Coatings & Refinishings

Equipment & Services

Key Benefits

- **Reduce Costs:** Use bakeware and equipment longer and eliminate or reduce secondary release agents (oil, silicone, paper).
- **Decrease Cleaning Time:** Enjoy minimal maintenance and cleaning.
- **Increase Efficiency:** Experience fewer work stoppages and handling errors with straightened pans.
- **Increase Productivity:** Increase yield and reduce waste from depanning issues.
- **Improve Product Quality:** Ensure product consistency through improved dough flow and release.
- **Increase Safety & Cleanliness:** Create a safer environment with reduced fire hazards due to reduction or elimination of oils and grease.
- **Enhance Sustainability:** Limit environmental impact by reducing scrap levels, reducing consumption of oils and prolonging the life of your pans.
